

ANAKAM ANNOUNCES ANAKAM.TFA™ SOLUTION SATISFIES FEDERAL REQUIREMENTS AROUND TWO-FACTOR AUTHENTICATION

Anakam's Flagship Software Solution Meets Office of Management and Budget's Requirement for Two-Factor Authentication for Remote Access to Information System.

San Diego, CA June 1, 2007 – Anakam, Incorporated today announced that its two-factor authentication software solution, Anakam.TFA™, satisfies recently released Federal government requirements governing remote access to Federal information.

In a [memorandum](#) for the heads of all executive departments and agencies entitled “Safeguarding Against and Responding to the Breach of Personally Identifiable Information,” Office of Management and Budget (OMB) Deputy Director for Management Clay Johnson III laid out five requirements that agencies must implement. The second requirement regarding the control of remote access to information systems requires that agencies “allow remote access only with two-factor authentication where one of the factors is provided by a device separate from the computer gaining access.”

“We’re pleased that the Anakam two-factor authentication solution can assist the government in protecting critical Federal information, especially in the areas of homeland and national security,” said Allan Camaisa, Anakam Chief Executive Officer and Founder. “Since OMB expects departments and agencies to implement the new requirements using existing agency resources, we think Anakam.TFA™ is the perfect solution since it can be deployed at significant cost savings compared to legacy token, fob, or smart card solutions. For agencies that support large user bases at dispersed locations, we offer a wide range of options that can be custom configured to meet diverse requirements while maintaining economical operating costs.”

Camaisa added that the Anakam Identity Suite™, which in addition to Anakam.TFA™ includes ID Proofing, Credentialing, and Data Protection System solutions, provides customers with a full spectrum of identity management tools at a fraction of the cost of existing token, fob, or smart card based systems.

For assistance in analyzing your organization’s two-factor authentication requirements and developing a compliance strategy, contact Anakam’s Arlington, Virginia office at 703-963-7209, San Diego office at 858-622-9550, or visit us on the web at www.anakam.com.

About Anakam
